

JENKINS

Prerequisites

Jenkins requires Java7 or above to function. Java8 is recommended. Jenkins requires a fair amount of memory to operate well. Smaller installations should start around 256MB-1GB.

Download and Install Jenkins

1. Download Jenkins.exe file from the below location
<https://jenkins.io/index.html>
2. Click "Download" and select "window" option
D:\tools\jenkins-2.32.1.zip
3. Unzip and extract the content to the directory of your choice.
D:\tools\jenkins.msi
4. Double click "Jenkins.msi" and select folder of your choice
D:\tools\Jenkins
5. Enter the default password available in the below directory
D:\Tools\Jenkins\secrets\initialAdminPassword

6. By default Jenkins will run in the port 8080

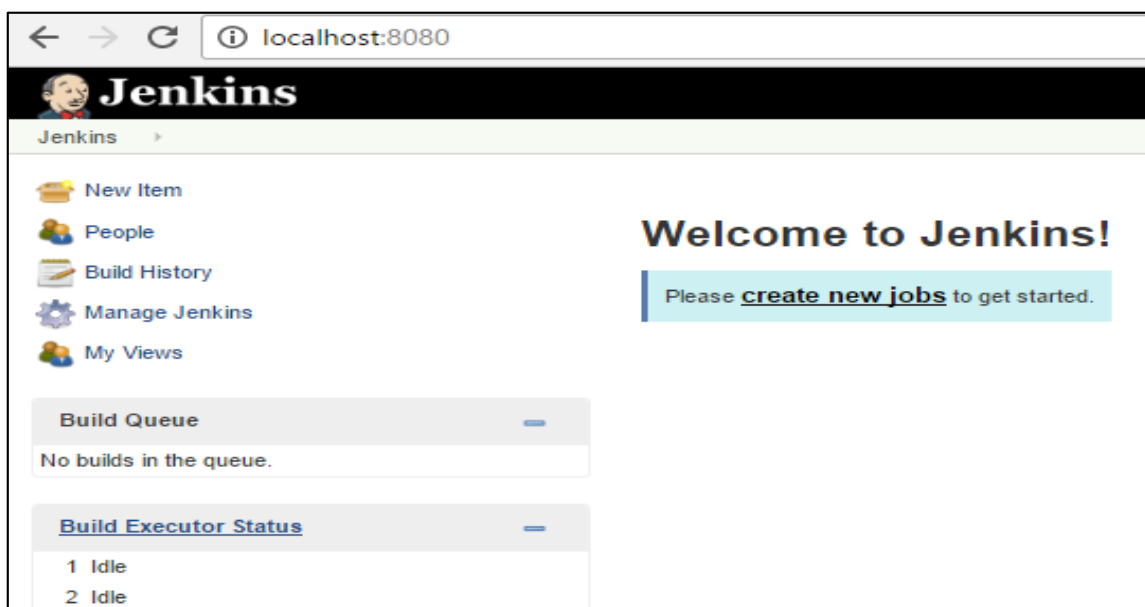

Jenkins is ready!

You've skipped creating an admin user. To log in, use the username: 'admin' and the administrator password you used to access the setup wizard.

Your Jenkins setup is complete.

Start using Jenkins

7. Make sure the Jenkins is working.
<http://localhost:8080>

Successfully installed Jenkins !!!

Username: admin

Password: techm123\$

Note : To change the port , <installation-dir>/jenkins.xml

Note: we can also run Jenkins as a war file
